Bicentennial Celebrations

Geological Society of London

John Milne

the man who mapped the shaking earth

Speaker: Paul Kabrna (Craven & Pendle Geological Society)

General introduction

John Milne became known as the 'Father of Modern Seismology'. They even called him 'Earthquake Milne'. He was a hero in Japan and lauded around the world although nowadays he's generally remembered only by seismologists. He was much more than just a foreign lecturer, mining engineer, geologist and seismologist. Milne was one of the great Victorian pioneers. This illustrated talk aims to celebrate Milne's many achievements.
